HD POLARIZED LENSES

COLOR BOOSTER & GLARECKER

Bollé introduced a new lens in its sunglasses range in 2019: the HD Polarized lens. Made with polycarbonate, this new lens is a combination of two essential technologies for when the sun is out. HD refers to our contrast-enhancing filter, now available on a great selection of styles. The second ingredient of this lens is polarization technology, which protects your eyes from reflected sunlight. The two components are united in the same lens to create the Bollé HD Polarized lens. You will never have to choose between contrast and polarization again.

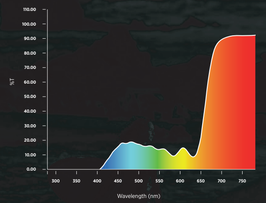

WHAT IS THE EFFECT ON THE COLOR SPECTRUM?

The red pigment reinforces the warm colors (red & orange). Red & Orange are the colors we see best as they have the longest wavelengths. That is why we decided to emphasize them, in order to increase contrast and improve your vision.

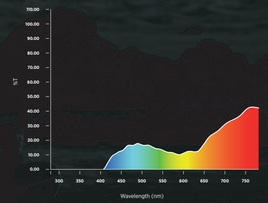

HOW DO HD POLARIZED LENSES WORK?

We have infused a specific red pigment into our lenses in order to reinforce the wavelengths of the red color. This solution brings a higher level of contrast and improves depth perception, without altering the base tint of our lenses.
Best to use in bright light conditions, HD Polarized lenses will enhance your sport experience whatever the chosen environment.

OTHER TREATMENTS

TREATMENTS & COATINGS

OLEO/ HYDROBIC

Our outer oleo/hydrophobic coating makes it nearly impossible for foreign bodies to latch on to your lenses. Available on all Bollé HD Polarized models and Phantom lenses.

ANTI-FOG

Unlike the other anti-fog coatings, our anti-fog coating incorporates permanent resistance to fogging but also scratches and chemicals. The treatment is applied to the lens (no spray, no dip coating) for retained properties even after repeated washing and years of use.

ANTI-REFLECTIVE

Light reflected on the inside of the lenses can harm your eyes. That's why our scientifically-engineered anti-reflective coating is applied to the inside of 6 base HD Polarized Bollé lenses.

FLASH MIRROR COATING: MASTER BOTH SUNLIGHT & STYLE

Improve your look and your vision with a flash mirror lens. Mirror coating ups your style while reinforcing filtration.

MARINE 2020

BRECKEN FLOATABLE

FIT: LARGE • 6BASE 59/45/13/139

AVAILABLE TECHNOLOGIES

- Floatable
- HD Polarized Lenses
- Oleo/Hydrophobic Treatment

NEVER LOSE IT AGAIN

Never lose your sunglasses again: Bollé brings new floating technology to its outdoor range. Derived from ones of your most popular lifestyle models. BRECKEN & HOLMAN have been paired with innovative floating features for those not afraid to get wet. Designed to stay afloat whether you are in the sea, on a lake, or in a pool, you´ll never lose your shades again with this floatable BRECKEN & HOMAN version. Air bubbles inside the temples for BRECKEN, or full temple construction in buoyancy material for HOLMAN, both styles come standardized with Bollé's first class HD Polarized lenses. Key features also include an oleo/hydrophobic coating to keep water drops away, and an anti-reflective treatment efficiently blocking the sun's glare.

HOLMAN FLOATABLE

FIT: MEDIUM • 6BASE 58/41/18/130

AVAILABLE TECHNOLOGIES

- Floatable
- HD Polarized Lenses
- Oleo/Hydrophobic Treatment
- Anti-Reflective Treatment

Combining sports design and a lifestyle shape, HOLMAN is a great choice for an active lifestyle. Lightweight and flexible TR90 nylon delivers great comfort and fit. Now available with floating technology, HOLMAN FLOATABLE is your best ally for water-based activities.
